If a continued prosecution application (CPA) was filed in the above-identified application, the filing date that determines patent term adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) system. (http://pair.uspto.gov)

Any questions regarding the patent term extension or adjustment determination should be directed to the Office of Patent Legal Administration at (703)305-1383.

Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: http://www.uspto.gov/main/howtofees.htm.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

Statement of Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: the closest prior art include Nurse Jr. et al. (US Patents 6,360,898B1 & 6,306,299B1), Hoffman et al. (US 2,750,045) and Bosnjak (US 3,951,818). However, none of these closest prior art and those searched have disclosed or rendered obvious a prefilter having the combination of limitations recited in the base claim 24, and in particular the limitations of a filter housing having a top and a bottom portions, a lower filter unit located in the bottom portion of the housing having superposed and spaced apart inclined lamellar structures having the shape of hollow truncated structures and the lower filter unit having a discharge chamber located in a centrally located zone of the lower filter unit, and an upper filter unit located in the top portion of the housing for further filtering the liquid previously filtered by the lower filter unit which comprises of superposed and spaced apart truncated hollow structures similar (defined as to be having the same shape and size) in shape and size and the upper filter unit having a reception chamber in a centrally located zone thereof in fluid communication with the discharge chamber of the lower filter unit and a discharge chamber in the top portion of the housing around the upper filter unit and further having the limitations of having a means for hermetically separating the reception chamber of the lower filter unit and the discharge chamber of the upper filter unit and a mounting means for mounting the upper and lower filter units vertically in the filter housing, as

Application/Control Number: 09/815,857

in claim 24, and a prefilter having the limitations claimed in claim 25 and further having the limitation of an inlet chamber extending at a bottom end of a filter housing in fluid communication with a reception chamber of the filter housing via an outlet of the inlet chamber hermetically connected to an inlet of the filter housing and the inlet chamber having a sidewall provided with a plurality of slots sized and shaped for receiving and prefiltering a liquid to be filtered and a mounting means for mounting filter units vertically in the filter housing, as in claim 25. Here in both claims 24 and 25, the limitation of a "mounting means for mounting the filter units vertically in the filter housing" invokes 35 USC 112, 6th paragraph "means plus function" language, which is defining the characteristics of a machine or manufacture invention, and this particular claim limitation must be interpreted to read on only the structures or materials disclosed in the specification and "equivalents thereof." (See M.P.E.P. section 2106, two en banc decisions of the Federal Circuit have made clear that the Office is to interpret means plus function language according to 35 U.S.C. 112, sixth paragraph. See also *In re Donaldson*, 16 F.3d 1189, 1193, 29 USPQ2d 1845, 1848 (Fed. Cir. 1994).) In this particular instance, the examiner has interpreted this limitation according to applicant's specification, which discloses only one equivalent structure for this "mounting means for mounting filter units vertically in the housing" being a hanger (54) having a lower portion for extending downwardly in the filter housing and brackets (58) in the lower portion connectable to an uppermost truncated cone/filter unit for suspending the upper and lower filter units in the filter housing (see specification page 11. lines 9 – 12). In addition, in claim 24, the limitation, "a means for hermetically separating the reception chamber of the lower filter unit and the discharge chamber of the upper filter unit"

also invokes 35 USC 112, 6th paragraph "means plus function" language, and here, being interpreted by the examiner, according to applicant's specification, which discloses only one equivalent structure being an annular water-tight liner (70) mounted on an inside rim formed by

an annular restriction (66), as in page 12, lines 26 – 30 and page 13, lines 1 – 4.
